**SEROLOGY & IMMUNOLOGY**

TEST	VALUE	UNIT	REFERENCE
HIV (CARD TEST)			
HIV - 1	NEGATIVE		
HIV - 2	NEGATIVE		

Rapid card tests are screening tests, false positive and false negative results may occur due to various factors which may influence test results.

Advise: Kindly confirm by ELISA or Western blot method.

1. A negative result implies that no Anti HIV – 1 & HIV - 2 antibodies have been detected in the sample by this method. This means that either the patient has not been exposed to HIV-1 or HIV-2 infection or the sample has been tested during the "WINDOW PHASE" (before the development of detectable levels of antibodies).
2. A positive result suggests the possibilities of HIV-I and/or HIV-II infection. However, these results must be verified by a confirmatory test (IFA / WESTERN BLOT I-II) before pronouncing the patient positive for HIV-1 and/or HIV-2 infection.

ALL reactive samples should be confirmed by using HIV Western Blot/PCR.

~~~ End of report ~~~

Mr. Sachin Sharma  
DMLT, Lab Incharge

Dr. A. K. Asthana  
MBBS, MD Pathologist

NOT VALID FOR MEDICO LEGAL PURPOSE

Work timings: Monday to Sunday, 8 am to 8 pm

Please correlate clinically. Although the test results are checked thoroughly, in case of any unexpected test results which could be due to machine error or typing error or any other reason please contact the lab immediately for a free evaluation.
